INTERNATIONAL LEADERSHIP DEVELOPMENT PROGRAMME AIMED AT MEMBERS OF INTERNATIONAL LEADERSHIP TEAMS

MULTILINGUAL PROGRAMME WITH SIMULTANEOUS TRANSLATION

The on-going experience of the participants in their congregations is the basis for learning and reflection. It is recognized that all those participating in the programme live extremely busy lives. The programme aims to sustain the participants in the ministry in which they are engaged.

METHODOLOGY

Methodology is experiential, process-based: it involves active participation.

The leadership experience of the participants is an important aspect of the programme and the starting point for any learning.

All along there is an interactive integration between theory and practice.

Staff accompany participants on the journey of the course, knowing that each participant's journey is unique. The ways of working are a varied set including practical exercises, interaction in large and small groups of application of work, reflection and discernment moments, integration spaces and role consultation.
